PROJECTS

Filmint - UI/UX Design (Skills: Figma, Microsoft Word, and Visual Paradigm) *May 2022*

● My group has 4 members including me, I and one of the group members make the UI and UX design of this application, my design in this application refers to several applications on App Store and Google Play. This is my most recent UI/UX design this year. This project is based on a case given by the lecture. The development of this application use Figma, Microsoft Word, and Visual Paradigm.

Finvest - UI/UX Design (Skills: Figma) *May 2021*

● I build this project on Figma for one of my assignments for UI/UX Pretorian Class by Bina Nusantara Computer Club. Finvest was built from a real-life problem happening in Indonesia. Finvest wants to upskill the finance literature in Indonesia so the people not only know how to get the money but also know how to manage that money.

Stim - Java GUI Program (Skills: Java, MySQL, Xampp) *Oct - Nov 2021*

● Me and three others group members create and develop a Java GUI application based on a case given by the lecture. The development of this application uses Java, Eclipse IDE, MySql, Xampp, and Github. There are two roles in the application, the first one is a player and the second one is a developer. The developer can manage the game and genre (input, delete, update). The player can buy any available game from Stim.

Edu-Shop - UI/UX Design (Skills: Figma, Microsft Word, and Visual Paradigm) *April 2022*

● My group has 4 members including me. I and one of the group members make the UI and UX design of this application. This application is based on a case given by the lecture. My design references are based on several education websites. Edu-Shop help anyone to improve their knowledge with seminars, workshops, public classes, private classes, and mixed class. The development of this application use Figma, Microsoft Word, and Visual Paradigm.

Mama's Kitchen - Wordpress (Skills: Wordpress, domain, hosting) *Jan - May 2022*

● My group has 5 members including me, we divide the work by each section of the page. Me and one of the group members worked on the Shop page while the others worked on other pages. This project uses Elementor and Woocommerce plugin. The development of this project is based on a real shop owned by a friend of our group members. This project use wordpress, domain, and hosting in one of the local hosting providers.
